LIST OF PUBLICATIONS AND OTHER PRINTED MATERIAL OF THE AGRICULTURAL ADJUSTMENT ADMINISTRATION

May 12, 1933, to June 1, 1934

INTRODUCTION

This pamphlet lists the printed material of the Agricultural Adjustment Administration classified as general regulations; commodity regulations, general informative publications; marketing agreements, licenses, and codes; and production-adjustment material. Descriptions of the nature and scope of the different series of material are given in this introduction.

DISTRIBUTION OF PUBLICATIONS

Because editions are limited, it is not possible to have in stock at all times a supply of every publication issued. It has, therefore, been found necessary to restrict the number furnished free in reply to individual requests. This Administration does not sell publications.

Publications for sale are indicated by an asterisk (*), followed by the price. Remittances for such documents should be made direct to the SUPERINTENDENT OF DOCUMENTS, Washington, D.C., by coupons, postal money order, express order, or check. Currency may be sent at sender's risk. For convenience in remitting, coupons having a face value of 5 cents each are sold by the Superintendent of Documents in sheets of 20 for \$1. POSTAGE STAMPS CANNOT BE ACCEPTED IN PAYMENT.

FREE PUBLICATIONS

Requests for free publications should be addressed to the Correspondence, Records, and Printing Section, Division of Information, Agricultural Adjustment Administration, Washington, D.C.

Be sure to write name and address plainly and indicate street and number or rural route number, as the case may be.

Indicate by both number and title the publication you desire.

Do NOT SEND MONEY or STAMPS to the Administration in payment for publications or information.

NATURE AND SCOPE OF THE DIFFERENT SERIES

The various series of publications issued by the Administration are here listed in order.

GENERAL REGULATIONS

General Regulations are issued by the Secretary of Agriculture with the approval of the President in accordance with the provisions of the Agricultural Adjustment Act, as amended. These regulations cover decisions and other information needed in applying the Agricultural Adjustment Act. Distribution is limited to public officials whose duties make it necessary for them to have such information; to journals especially concerned; and to manufacturers and firms and others whose business is affected by the regulations.

COMMODITY REGULATIONS

Commodity Regulations (R Series) are issued when deemed necessary by the Secretary of Agriculture in connection with programs relating to the basic agricultural commodities, in accordance with the provisions of title I of the Agricultural Adjustment Act, as amended—wheat, cotton, field corn, hogs, rice, tobacco, milk and its products, cattle, peanuts, rye, flax, barley, and grain sorghums. These regulations comprise definitions, rate of processing tax, conversion factors, etc.

GENERAL INFORMATIVE PUBLICATIONS

These publications include addresses, reprints of articles by officials of the Department of Agriculture, and other statements and publications of general interest to persons concerned with agricultural problems. They cover various phases of the Agricultural Adjustment Administration's programs and accomplishments.

In this pamphlet, at the head of each commodity list of Production-Adjustment Material, are grouped items that are informative in nature, which relate specifically to the commodity and differ from the forms, blanks, regulations, and administrative rulings necessary to adjust production. This is done for the convenience of persons desiring general information on the commodity rather than the other items mentioned.

MARKETING AGREEMENTS, LICENSES, AND CODES

This series of publications is primarily of interest to various industries and relates largely to the marketing of agricultural products. The items are issued in pamphlet form and may be purchased from the Superintendent of Documents at 5 cents a copy.

PRODUCTION-ADJUSTMENT MATERIAL

Along with the informative publications, this series includes printed material of a miscellaneous nature which does not fall within the other series of the Administration. These forms are used in the production-adjustment programs for corn-hog, cotton, rice, tobacco, and wheat, and are of interest only to producers and others concerned with entering into contracts with the Secretary of Agriculture to adjust production. Many of these forms are out of print as the time limit has expired for these seasonal commodities. However, those available will be furnished to interested persons.
